

Granite Ridge/Guardian Shingle

Bjorkstrand

METAL ROOFING LLC

"The Last Roof You Will Ever Need"

Granite Ridge - Onyx

Guardian Shingle - Weathered Slate

Gerard's Granite Ridge and Guardian shingles are the best alternative to high end composite architectural shingles. Warranted for life Gerard Shingles resemble the appearance of asphalt shingles but will not support warping, cracking or curling which are common causes of roof failure. The Granite Ridge and Guardian Shingles are more durable than most traditional forms of roofing, they are warranted against 120 mph winds, and hail stones of 2.5" in diameter. Steel shingles manufactured by Gerard are an excellent choice for those wanting the style of composite shingles but with the advantages of steel.

- **Lighter than asphalt**
- **Non combustible steel**
- **Warranted against 2.5" hail stones**
- **Guaranteed not to crack, curl or break**
- **Warranted against winds of up to 120 mph**
- **Batten less install method reduce installation costs**

Dimensions		Installation
Panel Width : 46.2"		Battenless installation Solid Sheathing 2x2 wood or metal battens Re-roof over asphalt shingle Re-roof over wood shake / shingles Minimum Roof Slope: 4:12 Maximum Roof Slope : 12:12 full vertical face
Panel Length : 15.6"		
Pcs / Square : 24 shingles		
Weight / sq.ft. : 1.2 lbs.		
Substrate	Testing	Extra
26 gauge Zinc allum	UL-580 Wind Uplift UL-790 Fire UL-1897 Uplift UL-2218 Impact	Transferable Lifetime Warranty Texas Department of Insurance Credits Available May reduce insurance premiums ICC ESR May qualify for energy savings rebates and/or credits
